■ Debugging Tips

- Use **debugger;** inside JavaScript to pause execution. - **console.log(JSON.stringify(object, null, 2))** → Pretty JSON output. - **console.trace()** → Show the stack trace. - Use VS Code breakpoints (F9) and step controls (F10, F11).

■ **Pro Tip:** Use **Ctrl + Shift + P** (Command Palette) to quickly access most features in VS Code.
